

An aerial night view of a port with a city skyline in the background. The scene is illuminated by warm sunset colors and city lights. A large container ship is docked at a pier, and a smaller cargo ship is in the water. A glowing blue and orange light trail curves around the left side of the image. A glowing blue and orange light trail curves around the right side of the image.

SCG JWD
LOGISTICS

OUR STRENGTH

Ability to serve full spectrum & seamless integrated logistics & supply chain solutions in ASEAN

Insightful & experience of serving both high-value added and industrial segments

Digitalization and innovation to ensure highest level of service, safety and sustainability

Strategic locations covering 9 ASEAN countries + China

SEAMLESS AND MOST INTEGRATED LOGISTICS & SUPPLY CHAIN SOLUTION THROUGHOUT LOGISTICS VALUE CHAIN

Logistics Infrastructure

- Port/terminal
- Barge
- Customs clearance

- Manufacturing goods

SUPPLY CHAIN DIGITAL PLATFORMS & INNOVATION

Data Analytics

Benefits of using big data in logistics

- **Optimization:** Improves SLA, times, the use of resources, and coverage with real-time data.
- **Integration:** Updated insights to prevent and resolve disruptions.
- **Automation:** Automatic data collection on demographics, weather, and traffic.
- **Commercialization:** Market intelligence uses data for competitive advantage.

SUPPLY CHAIN DIGITAL PLATFORMS & INNOVATION

Logistics Command Center

Logistics Command Center is established to increase confidence that the products will be delivered on time, accurately, and safely as well as to ensure product quality and reduce delivery damage. The application is available 24 hours a day, seven days a week, together with a professional team that provides service with care at every stage of the delivery procedure, from the beginning point to the destination.

- Data visualization
- Reduce accident rate
- Real-time safety monitoring
- Improve service level

SUPPLY CHAIN DIGITAL PLATFORMS & INNOVATION

Telematics Solutions

The latest technology for safety standards enhancement, helps create sustainable logistics for society.

The solution consists of:

- AI safety tools: Advanced Driver Assistance Systems (ADAS) & Driver Monitoring System
- (DMS Camera) which work together and alert when detecting any sign of possible accidents.
- Smart GPS
- Report & Real-time Monitoring Dashboard

AUTOMATIC ALERT SYSTEM

IN REAL-TIME WHEN RISKY BEHAVIOR
